

A HUB FOR TECH TRAINING

Wake Tech's new campus strengthens connections to RTP business and industry.

Wake Technical Community College's RTP Campus in Morrisville connects higher education with industry and offers a collaborative approach to education and training.

"Innovation fuels the RTP Campus," says Wake Tech President Scott Ralls. "It is strategically positioned to meet the workforce training needs of the community that surrounds it."

RTP Campus programs are designed for high-tech professionals, offering specializations in cyber security, business analytics, project management, network management and more. Wake Tech's industry partnerships ensure that students are learning the latest technologies and most relevant skills, with opportunities for work-based learning.

Tom Looney, retired Lenovo executive and Chair of Wake Tech's Board of Trustees, says tech companies know that their industry depends on highly-skilled workers and are embracing the role they play in providing specialized training. "By partnering with Wake Tech, companies know they'll have a workforce that's ready to go on 'day one'."

The RTP Campus houses Wake Tech's apprenticeship program. It also has a veterans resource center and is home to one of 12 Military Business Centers in the state, connecting local firms with military and other federal business opportunities. The campus also offers degree options for transfer to a university.

A second building at the campus is under construction. Learn more at rtp.waketech.edu. #WakeTechRTP
